Profile

My journey in development started with one class at General Assembly. I quickly developed a real passion for the complexities involved. I took some time to educate myself before enrolling in the full stack program at Austin Coding Academy. After completing the program I took time to work on personal projects and hone my skills. I am currently a project manager with Rutenberg Media and a teaching assistant with Austin Coding Academy.

Experience

Rutenberg Media

Project Manager

*Managed a global team of developers
Ensured product goals were clearly communicated and completed to standards
Used scrum and agile methods to ensure maximum efficiency of all involved*
